Features

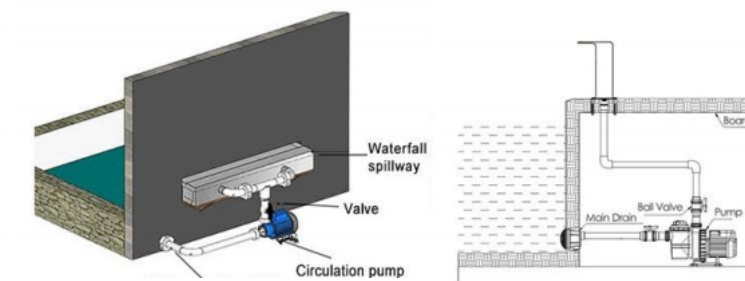

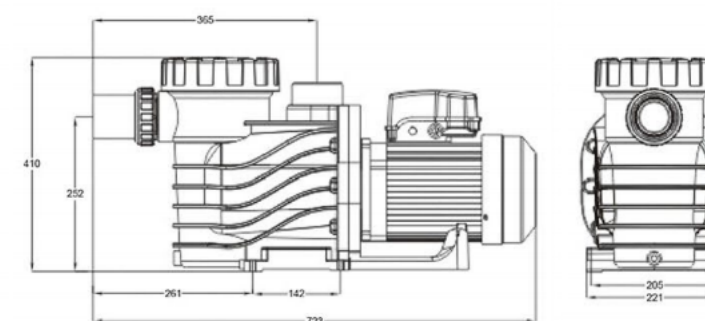

series is designed according to the Principles of hydraulics. Its motor is with external ventilation design, and the winding design is advanced. The liquid part is made of high reinforced engineering plastic which is durable. The strainer with high capacity helps reducing the cleaning work. It is with good performance and high efficiency. It accelerates water injection (irrigation) rate and improves energy efficiency. It is applicable to: swimming pool, industrial water, oceans pavilion, water park, etc.

■ SP pump with three-phase motors

Features

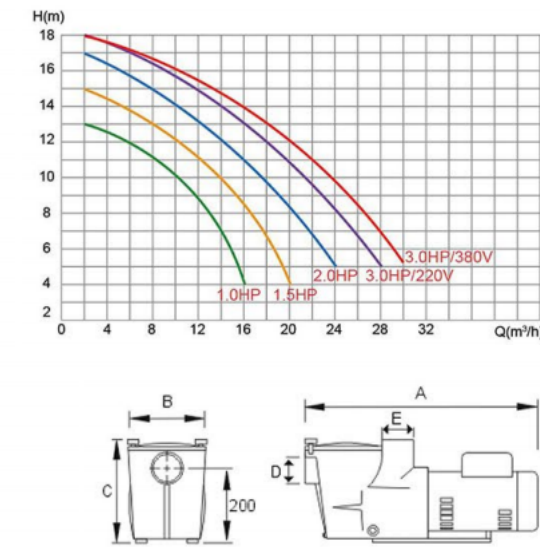

SP series is designed according to the Principles of hydraulics tsmotor iswith internal ventilation de sign and the winding design is advanced .Liquids part is made of high reinforce engine ering plastic which is durable .The strainer with high capacity helps reducing the cleaning work. It is with good performance and high efficiency.It accelerates water njectionirrigation)rate and improvesenergy efficie ncy. It is applicable to :swimming pool, industrial water, oceans pavilion , water park, etc.
